Project Development Phase Sprint 4

Date	21-11- 2022
Team ID	PNT2022TMID50339
Project Name	Virtual Eye - Life Guard for Swimming Pools To
	Detect Active Drowning
Maximum Marks	4Marks

1. Run the application

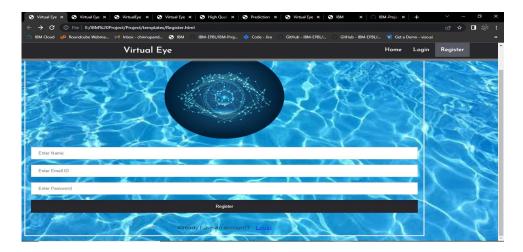

In the command prompt, navigate to the folder in which the flask app is present. When the python file is executed the localhost is activated on 5000 port and can be accessed through it.

```
env) C:\Users\ELCOT\Downloads\pythonProject10\pythonProject10>python -m flask run
Environment: production
  Use a production WSGI server instead.

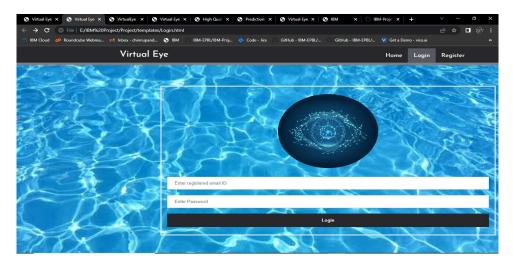

Debug mode: off
Error 263 for command:
     close alarm.mp3
The specified device is not open or is not recognized by MCI.
 Failed to close the file: alarm.mp3 127.0.0.1 - - [12/Nov/2022 22:34:21] "POST /result HTTP/1.1" 200 -
```

2. Open the browser and navigate to check your application

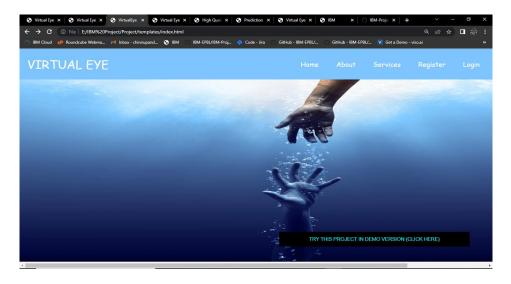

The home page looks like this. You can click on login or register

While logging in you need to provide your registered credentials

After successfully login you will redirect to the prediction page where we have to click on the demo button to launch the open cv window for video analysis.

Output:
